Education

2022
APPLIED SCIENCE UNIVERSITY/
BACHELOR'S DEGREE IN
COMPUTER SCIENCE—*CS DEGREE*

2014
NBA INDEPENDENT SECONDARY SCHOOL

Training & projects

- **Frontend mentor** helped me a lot in my learning journey. It gave me the motivation and passion to learn more about HTML, CSS, and JS components. I've done projects from the website and the link for reviewing my projects: FRONTEND MENTOR | BILLAL'S PROFILE

- Built and released a responsive web app using FIREBASE, allowing users to schedule social media posts across Twitter and Instagram, which quickly grew to over 500 monthly active users.

- I built a React Admin Dashboard App with multiple pages and features, including custom charts and calendar and more. I used React useContext state management. I also created Twig templates to manage the application's front end and compiled that using Webpack.

- I trained with sidrabank and did the loyaltinum frontend project, which was a huge success! i used next.jsx to handle all apis and auth, as well as handling chainsidra. with them i worked on several projects so far and helped them create multiple apps using flutte which is an open source platform that works as an app and website.
